Request: Address a Specific Agenda Item

Agenda Item: 72

Comments: I would like the board of Supervisors to vote No on agenda number 72 in tomorrow's meeting. While I appreciate helping the homeless, many of our homeless are in this situation because of rising house prices, rising rent, little increase in minimum wage, medical debt and sadly most of our government officials are allowing private equity firms to buy up housing. I understand having shelters in place but unfortunately those shelters will eventually be cramped and full. It is safer for them to be on the sidewalk, in parks, empty shopping lots and etc, especially with this administration's hatred of the homeless and with ICE rounding up any non white person they see. I ask to just check on those on the streets every so often and provide any help you can regardless if they are on the sidewalk or in a shelter. Do not make it illegal for them to be in public areas many are afraid so it is better to slowly convince them to receive help than to force help onto them. Especially now when it might be quite possible that many of us might lose our homes due to economic strife worsening during this presidency. So please help them but by not making being homeless illegal.

Thank You.
